Spec Sheet | Build Your Own | Exit Terminating left or Right

Suitable for standard Gas & Electrical equipment.
Each piece of equipment to have maximum overall depth of 900mm front to back.

Useful tips

In accordance with DW172 regulations please observe the following: A 300mm overhang should be allowed to the left and right of all your cooking appliances. You should also allow a 300mm overhang to the front of all your cooking appliances where a combi oven is not in use. The overall size should therefore be the equipment size plus the overhang.

Useful Tips with Combi

In accordance with DW172 regulations please observe the following: A 300mm overhang should be allowed to the left and right of all your cooking appliances. You should also allow a 600mm overhang to the front of all your cooking appliances where a combi oven is in use. The overall size should therefore be the equipment size plus the overhang, normally 1500mm deep.
