---

## Useful tips

In accordance with DW172 regulations please observe the following: A 300mm overhang should be allowed to the left and right of all your cooking appliances. You should also allow a 300mm overhang to the front of all your cooking appliances where a combi oven is not in use. The overall size should therefore be the equipment size plus the overhang.

## Useful Tips with Combi

In accordance with DW172 regulations please observe the following: A 300mm overhang should be allowed to the left and right of all your cooking appliances. You should also allow a 600mm overhang to the front of all your cooking appliances where a combi oven is in use. The overall size should therefore be the equipment size plus the overhang, normally 1500mm deep.
